Profile

Trusted Quality. Expert Service

We put nearly a century of experience into the development and manufacture of quality yarn spinning solutions you can trust. Grounded in American heritage, yet driven to innovate, A. B. Carter is known for spinning solutions that are proven to perform. We believe that our unparalleled industry knowledge coupled with dependable and reliable service enables our customers around the world to run their business with confidence.

Headquartered in Gastonia, North Carolina, A. B. Carter, Inc. has offices in 5 countries and agents in 44 countries. A. B. Carter is universally recognized as a superior supplier of spinning solutions for the fiber and yarn manufacturing sectors of the textile industry. Core products include steel and nylon travellers, rings, bobbins, tapes and belts, air splicing and knotting equipment, laboratory testing equipment, and stainless steel belts, counterbands, pressure rolls and other accessories for the carpet industry. Diverse, global solutions combined with our reputation for exceptional quality and service, positions A. B. Carter as the spinning industry's "go-to" team of experts.

Our History

Nearly 100 years ago, A. B. Carter, Inc. was founded by Arthur Bynum Carter, who started his textile career at the young age of fourteen with J. M. Odell Mfg. Co. His passion for the textile industry would lay a foundation for A. B. Carter of trusted quality and expert service. Our first manufacturing project was the production of the Boyce Weavers Knotter. At the request of those in the industry, Mr. Carter improved the Knotter for use on new types of yarn that were being developed. Mr. Carter believed then, as we still believe now, that our customers are our partners and we should always go above and beyond to serve them. Mr. Carter's interest and expertise in the application of rings and travellers for producing quality spun yarns led the way for establishing the metal traveller business in 1937. We have continually grown this business through the years and are now considered one of the top producers of high quality travellers worldwide. In addition to travellers and rings, A. B. Carter, Inc. supplies a diverse line of products, including parts and accessories for cotton and synthetic spinning plants, fiberglass producers, industrial yarn processors, and carpet yarn manufacturers; making us a one-stop solution provider for all your textile yarn needs.

DRAW TEXTURISING MACHINE, DOUBLE DENSITY DTY MACHINE, AIR DRAW TEXTURISING MACHINE, DRAW ASSEMBLY WINDER, WINDER, TWO FOR ONE TWISTER, LOOMS

How we took off..

"When you focus on nothing but on your dream...nothing can stop it from becoming a successful reality."

After starting with a workshop in Andheri with job work of many reputed companies, the seeds of entrepreneurial excellence finally started sprouting and showing promises of great growth.

How we do that..

With complete conviction and confidence in ourselves as well as well balanced synergy of man and machine. we have been fortunate enough to establish the most sound and stable infrastructure for superlative performance.

How we excel..

We excel by practicing absolute penchant for quality. Quality makes us what we are. Nothing is more important than our pledge to quality and we follow an uncompromised attitude to achieve that.

Profile

Dynavac® is a manufacturer of industrial and commercial cleaning equipment and dust collection systems for professionals, companies, and businesses since 1989. Dynavac® started operations 25 years ago in 1989 and was the first industrial vacuum cleaner manufacturer in India. Over the last 15 years, Dynavac® has expanded its portfolio of products to manufacture a diverse range of dust collectors as well.

At Dynavac, we are committed to total customer satisfaction. We achieve this goal by providing effective solutions to meet the specific needs of our customers and immediate service when needed. Our network of service engineers around the country allows us to provide our customers with unmatched service. We strive to respond to requests for service within 24 hours.

We are committed to helping you keep your industrial environment clean and safe. In addition to our expansive range of standard industrial cleaning and pollution control equipment, we offer custom vacuum equipment to meet your specific needs. We custom design multi point suction capable centralized vacuum cleaning solutions, reusable material recovery systems, vacuum tables and more.

If you are looking for a blower manufacturer, paint booth manufacturer, industrial vacuum cleaner manufacturer or dust collector manufacturer, Dynavac offers the products and services you need. Our team has a passion for excellence and a commitment to hard work. We offer more than just equipment; we provide solutions to help our customers increase profitability and productivity while maintaining a safe and clean industrial environment.

Cell: +91 9324670412 / 7738069441
Email: varungupta@inarco.com
Website: www.inarco.com

Profile

Inaugurated in 1990 by Mr. William Locke, Vice President, Armstrong World Industries Inc, USA , Inarco Bhavnagar, in Gujarat , is the single largest integrated cots and aprons manufacturing unit in South Asia. In 2016, increased global demand led to the inauguration of a state of the art, intensely automated manufacturing facility next door in Bhojapara, Gujarat. Designed in conjunction with the Kaizen Institute, the highest quality products are assured. Together, these two plants make Inarco the largest cots and aprons manufacturer globally with a daily capacity of 4 lac pieces.

Making Performance Count

Since 2005, we have worked with the Kaizen institute and Honey well technologies on a host of LEAN, TPM and TQC tools to improve quality, cost and delivery performance. We have developed a very robust "Kaizen Culture" which drives us to improve continuously. The Kaizen tools implemented in our factory:

5 "S"	Cellular Manufacturing	KANBAN System	SMED
Kanban Implementation	Early Management	Visual Management	Focus Improved Projects
Continuous Automation	Taguchi methods of Robust Design	Shainin methods for design of experiment	Jishu Hozen Autonomous maintenance

No Wonder That Inarco Is The Only Cots & Apron Manufacturer In The World To Be Awarded The Imai Operational Excellence Award (Kaizen Award).

The effective and reliable manufacturing technique backed by state of the art laboratory, rigorous real-time process control checks and continuous drive towards automation ensures highly consistent product performance batch after batch.... lot after lot.... day in and day out.

For at INARCO: ONLY PERFORMANCE COUNTS.

Profile

In 1991, ISC Tex Tech Pvt Ltd was the first manufacturing Company in North India, who had taken initiative to understand importance of the BOBBIN HOLDERS. Sometime due to Company Purchase policy and wrong info from suppliers leads to wrong selection of BOBBIN HOLDERS, it may cause Yarn breakage due to stretch in the Simplex hank roving. In the past Bobbin Holders was not considered as important part of Quality system though Bobbin Holders are contributing Thin and Thick in Yarn properties. After collecting best Bobbin Holders worldwide and in house R&D, ISC was able to develop best possible Bobbin Holders as on date and market leaders in Northern India apart from market shares in South and South East market.

At present ISC Tex Tech Pvt Ltd was able to produce and supply Bobbin Holders with all best feature available worldwide Bobbin Holders in Indian continents and South East Asian countries.

Our entire company is passionately committed to providing the highest level of service, support and value for the money. All users are getting advantage competitive price at convenient locations across the INDIA, 25 years of manufacturing experience, a knowledgeable Technocrat Sales & Service team, and friendly business etiquette.

Presently ISC Tex Tech Pvt Ltd is catering more than +400 customers in India for Bobbin Holders and overseas customers in 10 countries who are experiencing the benefits of working with ISC for replacement parts for the TEXTILE Industries.

MASTERS IN TEXTILE QUALITY CONTROL for Spinning and Weaving

LOEPFE BROTHERS LTD provides electronic Quality Control Systems for the Textile Industry. Our electronic control systems are used with success in spinning mills, weaving mills & other textile industries. All Loepfe products are Swiss Made and manufactured with the most modern production technologies.

YARNMASTER PRISMA and EOS

Loepfe guarantees 100% quality monitoring for winding and open-end spinning machines. The YarnMaster yarn clearers ensures reliability and top efficiency in online classification of faults. The universally usable sensors detect smallest faults and achieve reliable results under all production conditions.

WEFTMASTER

WeftMaster sensors are the leading technology which ensures 100% yarn and weft control for all types of weaving machines. Loepfe's tailor-made overall solutions are in use within many different industries ranging from textile, automotive, printing to electronics and many more.

MILLMASTER

The intelligent software of MillMaster TOP monitors the yarn quality - online and in real-time. The data of all connected machines and winding units are combined and shown in value-added reports. The quality processes are managed comfortably and with a variety of control and optimization functions, decisions are made on a sound basis.

POOJA ENTERPRISES was a dream of Mr. Prabhat Agarwal, a Technocrat and Visionary. Established in 1991, We have acquired a high reputation and earned experience in the field of manufacturing Textile Machineries, Furnaces, Dryers, Washers, Gas burners, Chemical Vessels, Auto & Allied activities as well as general and complicated fabrication jobs.

Since our inception, we have continually invested in our facilities and equipment's, ensuring enhancements in terms of capabilities and processes. We consider our people as the most valued asset in our journey of success. We are able to withstand the tight competition by following the basic principles of quality and customer satisfaction. Today, POOJA ENTERPRISES has achieved bright position in designing & manufacturing special purpose machines & equipment's all over India. Over the last 25 years, we have taken trend setting strides, constantly upgrading our products to meet the ever-changing needs of our valued customers. That is why, a majority of organizations in India trust us to deliver an advanced, energy-efficient equipment to increase their profitability, meet their targets, years after years with our state of the art technology. Our infrastructure consists of an excellent six workshops of 21,600 square feet constructed on a land of 54,000 square feet in Sachin G.I.D.C, Surat. Our Corporate Philosophy is to keep pace with the magnitude of technological change; timely delivery of high quality products that our clients look for. It has been our immense concern & endeavor to blend & synergize this fact in executing all the assignments. Our team works in synchronization with our clients to clearly understand their requirements and design products according to their specifications. Our customized services and on time delivery of products has enabled us in winning the trust and goodwill of our esteemed clients.

MACHINES ON DISPLAY:

1. Dryer for Digital Printing

- Compatible with all the digital printing machines (DTF).
- Available in a single pass or multipass design with one or two chambers depending on the fabric quality & production.
- Available in a single pass or multipass design with one or two chambers depending on the fabric quality & production.
- Conveyor belt helps with the sampling.

POOJA ENTERPRISES

Hall. Dyeing | Stand No. B-1/2/3/4

- Single Heating Options: Gas, Thermic Oil, Steam, Electric & Infrared.
- Dual heating options available.
- Multi flow air circulating system with uniform distribution of air on the fabric.
- Various options available for entry and exit ends.
- Reduced energy consumption. Low running cost.

2. Compressive Shrinking Range

- Suitable for fabric finishing.
- Main cylinder, pressure roll, tightening roll, bottom roll & blanket guide made from S.S. Pipe (304) instead of S.S cladding on M.S Pipe.
- Heating option: gas, Steam & Electric Heaters.
- Damping Unit (Optional).

3. Open Cum Rope Washing Range, Multi - Wash: - Pioneers In Washing Range.

- Low Water consumption.
- Installed more than 400 Washing Machines all over India.
- Washing from 1000 Meters to 3500 Meters / Hour as per client's requirement.
- Extra Loop arrangement for more production and better cleaning of fabric.
- Squeezing Mangle squeezes the liquor from the fabric.
- The squeezed fabric absorbs the liquor properly, resulting in better washing.
- Better Colour fastness.

4. S.S Open Winch

- Suitable for pre & post-treatment like dyeing, bleaching, scouring & washing under atmospheric pressure for both knitted & woven fabrics.
- Made from high-quality stainless steel for a longer life.
- Tensionless movement of the fabric.
- Options available from 2, 4, 6, 8, 10, 12, 14 & 16 ends.
- The machine operates at a max temperature of 90 C to 95 C.
- Highly efficient driving system. Optional VFD control can be equipped for different materials.

Types of models available:

1. 8" Inch dia rubber rolls & round Winch with elliptical winch.
2. 6" Inch dia Rubber rolls nip with elliptical winch.
3. Combination of both Round Winch & Rubber roll nip with an elliptical winch.
4. Colour addition funnel (Optional).

Cell: +91 9998474518
Email: info@pujacans.com
Website: www.pujacans.com

Profile

PUJA TEXTILE INDUSTRIES came into being in 1963 and has been specializing in manufacturing Sliver Cans since the foundation of the Company.

As the result of many years of study and research, we succeeded in developing the most outstanding Sliver Cans called PUJACANS which are quite free from dimensional expansion and contraction caused by wet and dry weather. Our production facilities enable us to offer to full range of currently used sliver Cans, from small Cans of 225 or 300mm for O. E. machine up to very large Cans diameters ranging from 1000 to 1400mm. and even 1600mm used in Rope Dying Denim Project. All of these cans meet the exact specification issued by textile equipment Manufacturers to make them suitable for use on modern high-output Machines. Thus, our PUJA CANS can well serve high speed operation and Carding Machines, Drawing Frame, Fly Frame and Open - End Spinning Frame.

PUJACANS are now used in worldwide Textile Industries. We Managed to achieve International quality in its manufacture of rivetless HDPE Sliver Cans for use in the spinning industry. To maintain uniform quality, we manufacture each and every components under its own roof and delivers complete assembled cans all over India.

Profile

Founded in 1985, Suzhou Wuzhong Spinneret Co., LTD. is professional factory manufacturing synthetic spinnerets. Produces a variety of high-precision spinnerets with various species and specifications, widely used in synthetic fields such as polyester, polyamide, polypropylene, polyurethane and so on. The company has undertaken two national scientific and technological key projects, one major scientific and technological project launched by Ministry of Textiles, and made a significant contribution to the Chinese chemical fiber industry. Meanwhile the company is devoted to customer pre-sale service and after-sale service and manages to get involved in customer production activities so that the company achieves a high market share, is depended on by many domestic and foreign chemical fiber manufacturers, and wins an excellent reputation. The goal of the company is to develop fiber spinnerets which could be used in more fields, advance to a cutting-edge area with higher precision and become a first-class brand.

Profile

We at Vibrant Engineers Private Limited, started at Coimbatore in 1989, have been in the reeds manufacturing business for more than twenty years and have a motto to support both the well established and developing textile industries.

We have been manufacturing 'Flat Reed' for the past 20 years. We supply flat reeds to all leading South Indian weaving industries for Sulzer, RUTI C, Rapier looms, etc.

With the rapidly changing market and technology, we added 'Profile Reed' to our list of repertoire couple of years back. We have been manufacturing 'Profile Reed' for the past 6 years, which is also being supplied to all leading Indian weaving industries. We have prided ourselves on 100% customer satisfaction and continued business orders from these weaving industries.

Regarding the machineries at Vibrant, our reed manufacturing and all the raw materials (ex: Profile dents, aluminium channels, binding wire and epoxyglue) are imported. At Coimbatore, we do top class framing work with industrial best standards (imported profile reed framing machine) for our clients. Choosing only the highest quality materials, reeds are produced under exacting condition resulting only the highest quality product, meeting the precision and durability needs of even the most demanding weaving requirements.

In today's competitive market scenario, we constantly innovate designs for the rapidly changing trends. These innovative products are offered at the most competitive prices followed by an unmatched after-sales service.

Now, we are looking to expand our reach further to all leading industries in India/abroad and looking forward to do business with you. Please feel free to contact us for further details and look forward to receive your valued inquiry.

ELECTRONIC COPY:

We have introduced an electronic version of COMMUNION, "Emag". The great philosopher Socrates once said "The secret of change is to focus all of your energy on building the new", we have tried to transmute your own COMMUNION into a digital format to make it more accessible and inclusive. By this initiative COMMUNION has stepped into a new world of digitalization and by its digital availability we are doing our bit to save the environment.

"Emag", is a monthly digital magazine which covers comprehensive information about the garment and textile industry with national and international news, views and articles available via email, whatsapp and SMS to nearly 2,00,000 manufacturers , exporters and buying houses of garment and textile industry and also to participants , visitors and delegates of various national & international trade fairs.

Since the COMMUNION has entered the new era of internet its radius has enhanced. Now "Emag" is available to you whether you are in the Middle East (UAE, Qatar & Yemen), East Asia (Myanmar, Laos, Cambodia & Thailand), North Asia (China, Hong Kong & Taiwan) or South Asia (India, Bangladesh, Sri Lanka & Nepal). So register yourself to avail the most comprehensive magazine, "Emag", and explore garment and textile industry on your smart phone, tab or computer.

Profile

Yogesh Dyestuff Products Pvt. Ltd. established in 1988 is a dyestuff company involved in manufacturing a wide range of Acrylic / Cationic, Paper, Leather and Fluorescent dyes. A vast majority of our products are exported across the globe to countries like USA, Europe, Austria, Japan, China.

Our corporate office is situated in Mumbai (formerly Bombay), the Economic Capital of India and our state of the art production facility is located at Tarapur which is about 80 kms from Mumbai. It's a modern plant with a laboratory for testing of the final products to maintain with the international standards and has R&D facilities to develop latest products. We are one of the members of "Common Effluent Treatment Plant" of our association at Tarapur & hence we keep the water pollution within the limits specified by the government as well as we work in the environment friendly atmosphere. We are catering to Indian Market as well as exporting our products to several countries across the globe.

This company belongs to Pansari Group who is experienced in Marketing of Acrylic Dyes & Fluorescent Dyes since the last 30 years. In the past, this group also imported the whole range of Acrylic Dyes from various world manufacturers. All the manufacturing units in their plant are members of "Common Effluent Treatment Plant" established at Tarapur & hence there is absolutely no issues of Pollution.

The entire manufacturing activities of this plant are carried out with strict quality control by qualified technologists and at every stage of processing, control tests are applied using modern instruments and test methods. The manufacturing units are ideally commissioned with most modern production facilities and required machineries, equipment's & instruments of reputed companies at Tarapur. All the raw materials are being procured either directly from manufacturers based in India or directly imported from manufacturers. Furthermore, the quality of the raw materials & intermediates are checked before with the help of following equipment's in our laboratory.
